

# CONVERTEX

At Convertex Ltd we have developed into a market leader for unique tape solutions. Unlocking our client's true potential, through increased productivity, extended design concepts, and improved product performance.

We have invested in the latest technology to expand our capabilities. Thus, allowing us to continue to be at the forefront of adhesive solutions, generating genuine benefits for our customers.

Our continual development, combined with our professional work ethic, has enabled us to enjoy long-term partnerships with many of our clients.

We are centred upon fulfilling our clients needs and supporting them with a comprehensive back-up service.

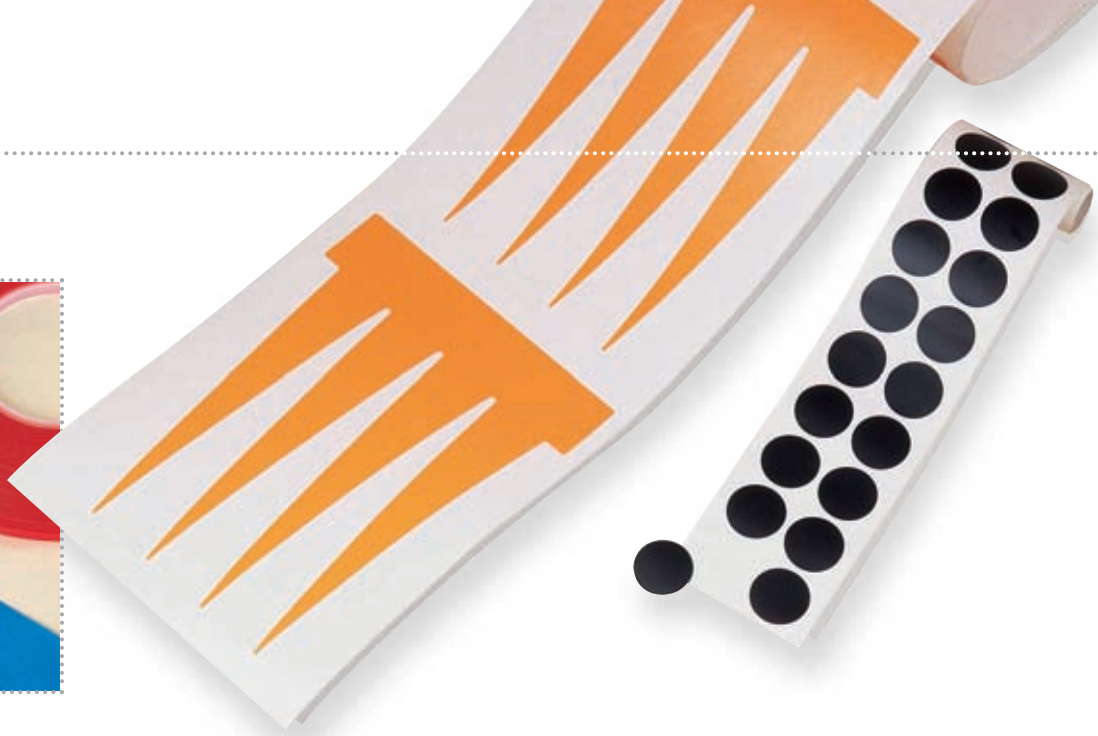

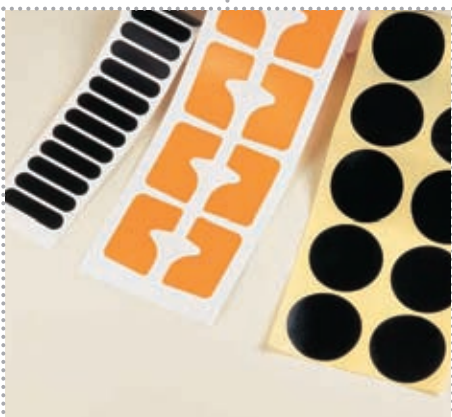

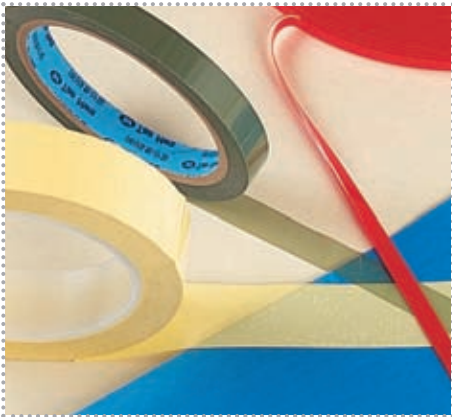

## Tape Solutions

Tapes can have a variety of bases, for example plastic, paper, metal, fabric and cellulose films.

These base products can be converted into either single or double sided formats, with a variety of thicknesses and release liners. As;

- Rolls
- Bobbins
- Laminates
- Die Cut Pads
- Single Gaskets
- Sheets

Our specially developed machinery allows us to fulfil exactly our customers production requirements. We are flexible when it comes to specialist solutions and smaller volumes. As we are not tied in with any one particular manufacturer (as most distributors tend to be), we can provide advice and recommendations that are not only unbiased, but result in the right product for you at the right price.

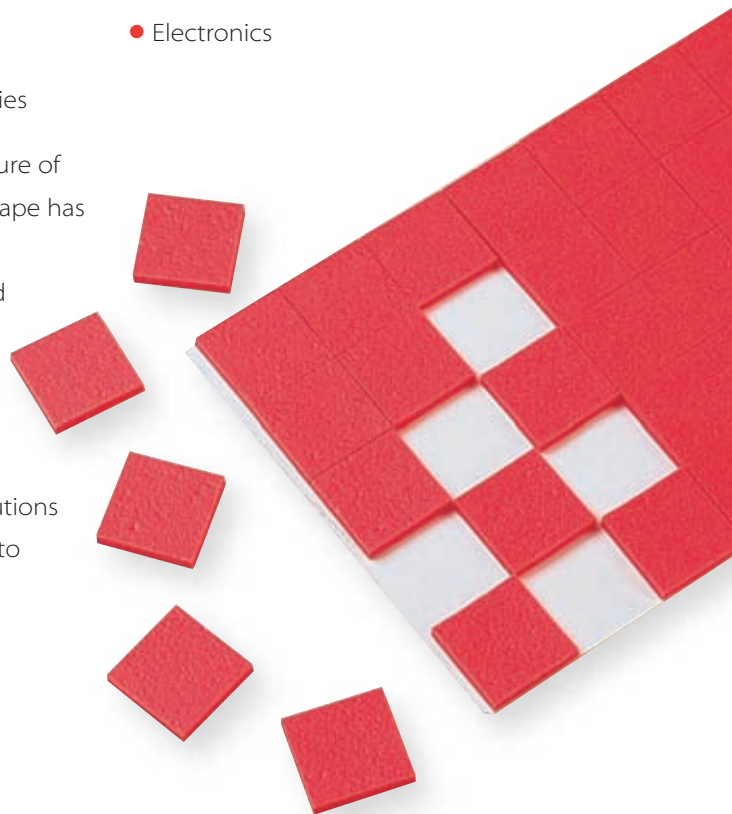

We have few standard off-the-shelf products, as all our tape solutions are manufactured to your exact specifications, using materials from the world's leading manufacturers.

## We supply specialist adhesive tapes to a wide range of industries and markets.

- Automotive
- Aerospace
- Telecommunications
- Electronics
- Construction Industries

Due to the diverse nature of these industries, each tape has to be made to precise requirements in limited amounts of time.

Our fast turnaround and specialist knowledge results in specialist adhesive solutions that offer real benefits to our customers.
